FIT MOST HANDLE INSTALLATION INSTRUCTIONS

1006964475

Tools Required:

Screwdriver

Helpful Tools:

Handle Removal Tool

Installation Instructions:

1. Remove the old handle from the stem. (Use handle puller if needed.)
2. Place the new metal handle adapter on the stem (as shown below, with prongs facing up), and tighten with screwdriver.
3. To install new handle: place new handle over the adapter, lining up the slots inside the handle with the prongs on the adapter. Pry off handle button.
4. Select the screw that best fits the height and width required to install the new handle. (Screw assortment included.) Place lock washer inside the top of the handle. Using a screwdriver, secure the handle by installing the screw.
5. Replace the handle button using the included hot, cold or diverter handle button.
