- Please keep this maunal properly for the reference in the future

USER MANUAL

Model CFLT-2011-DP

Read all instructions prior to installation.

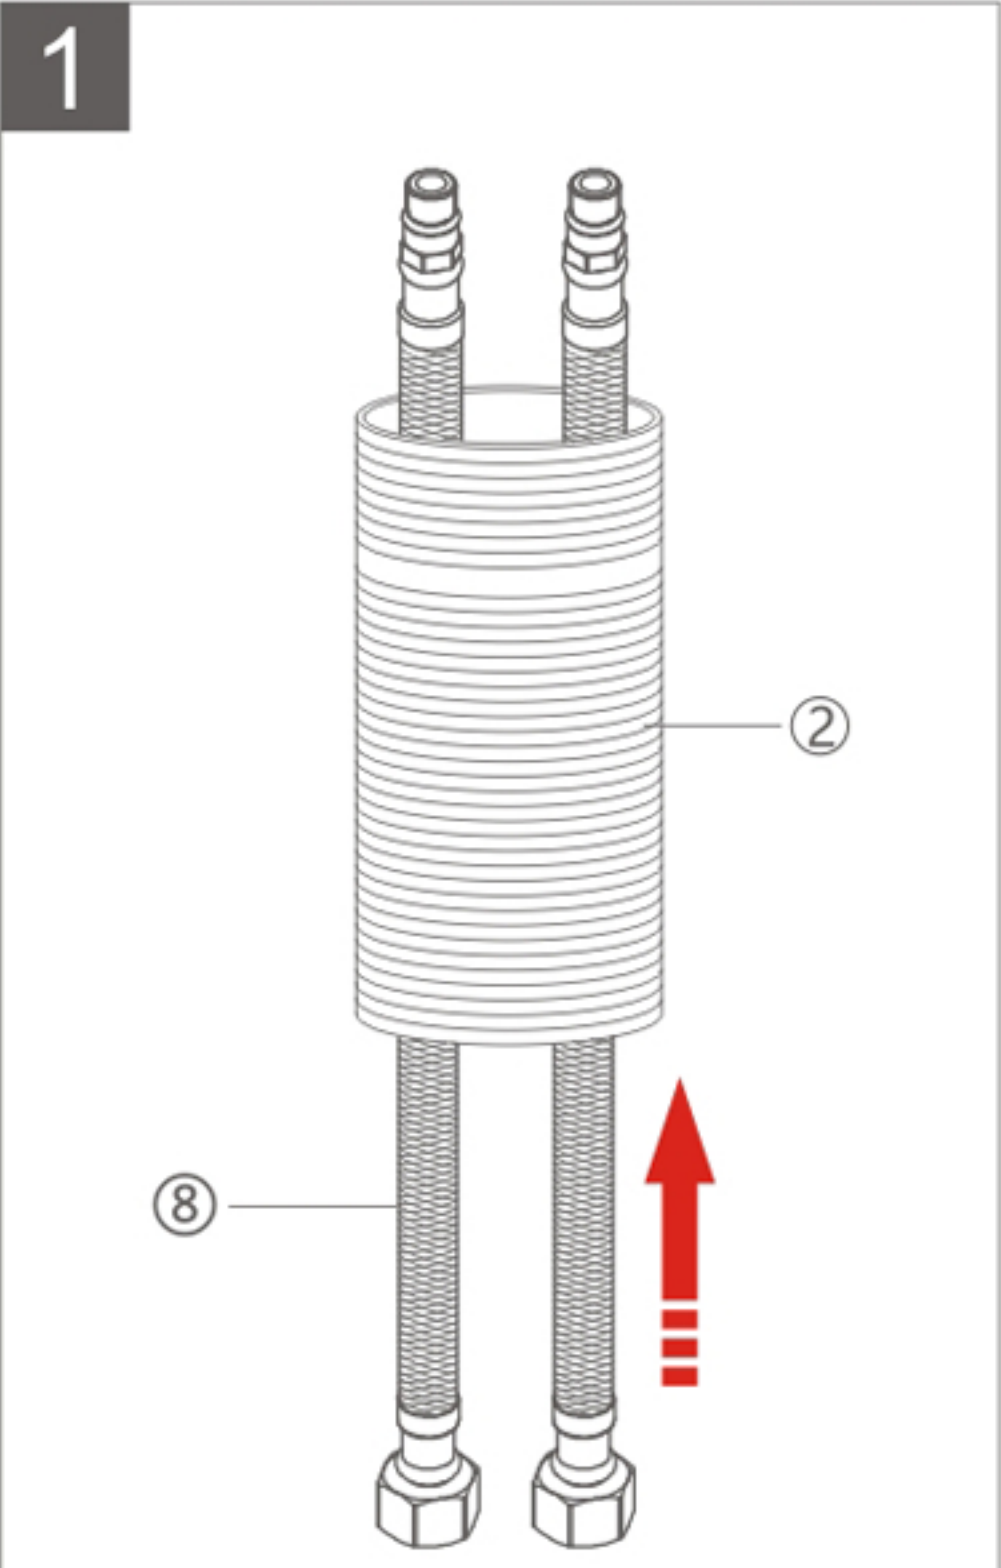

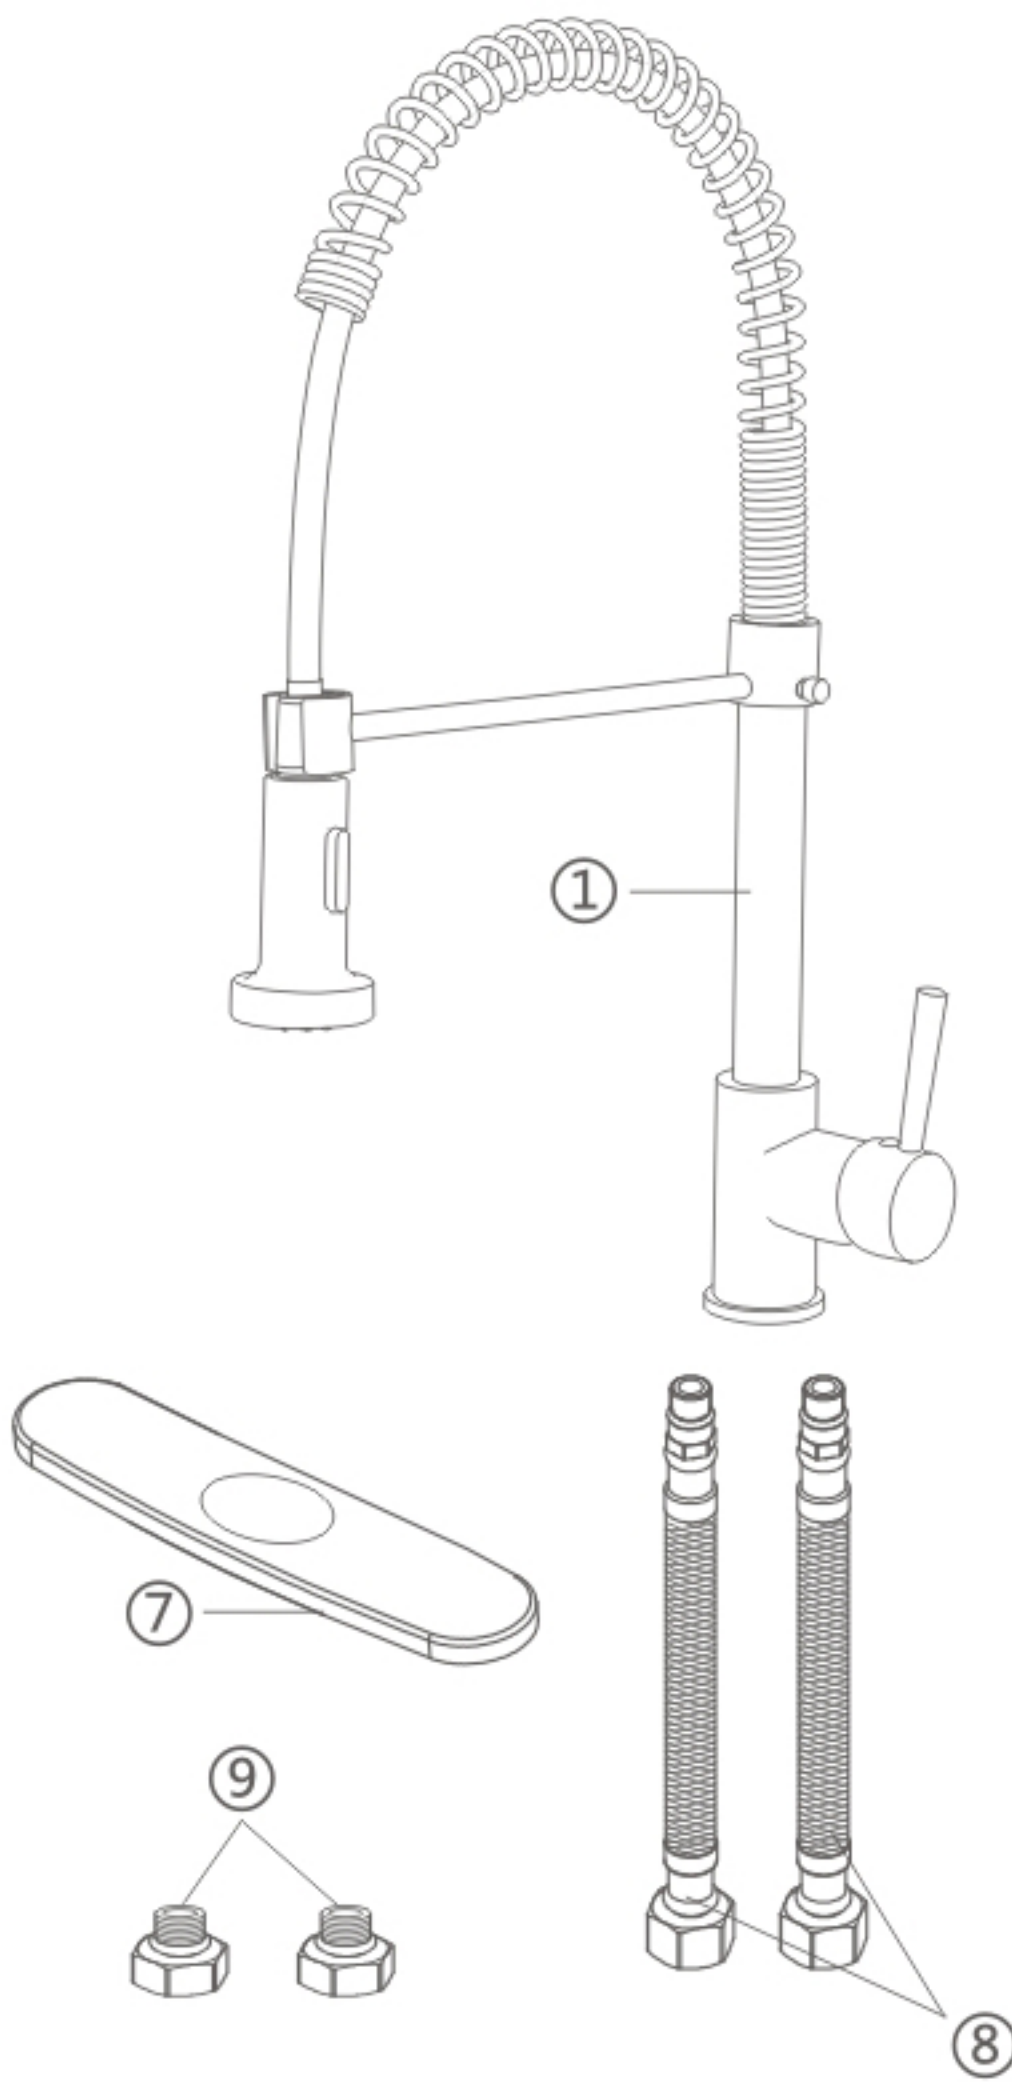

CAUTION

Failure to read these instructions prior to installation may result in personal injury, property damage, or product failure. Manufacturer assumes no responsibility for product failure due to improper installation.

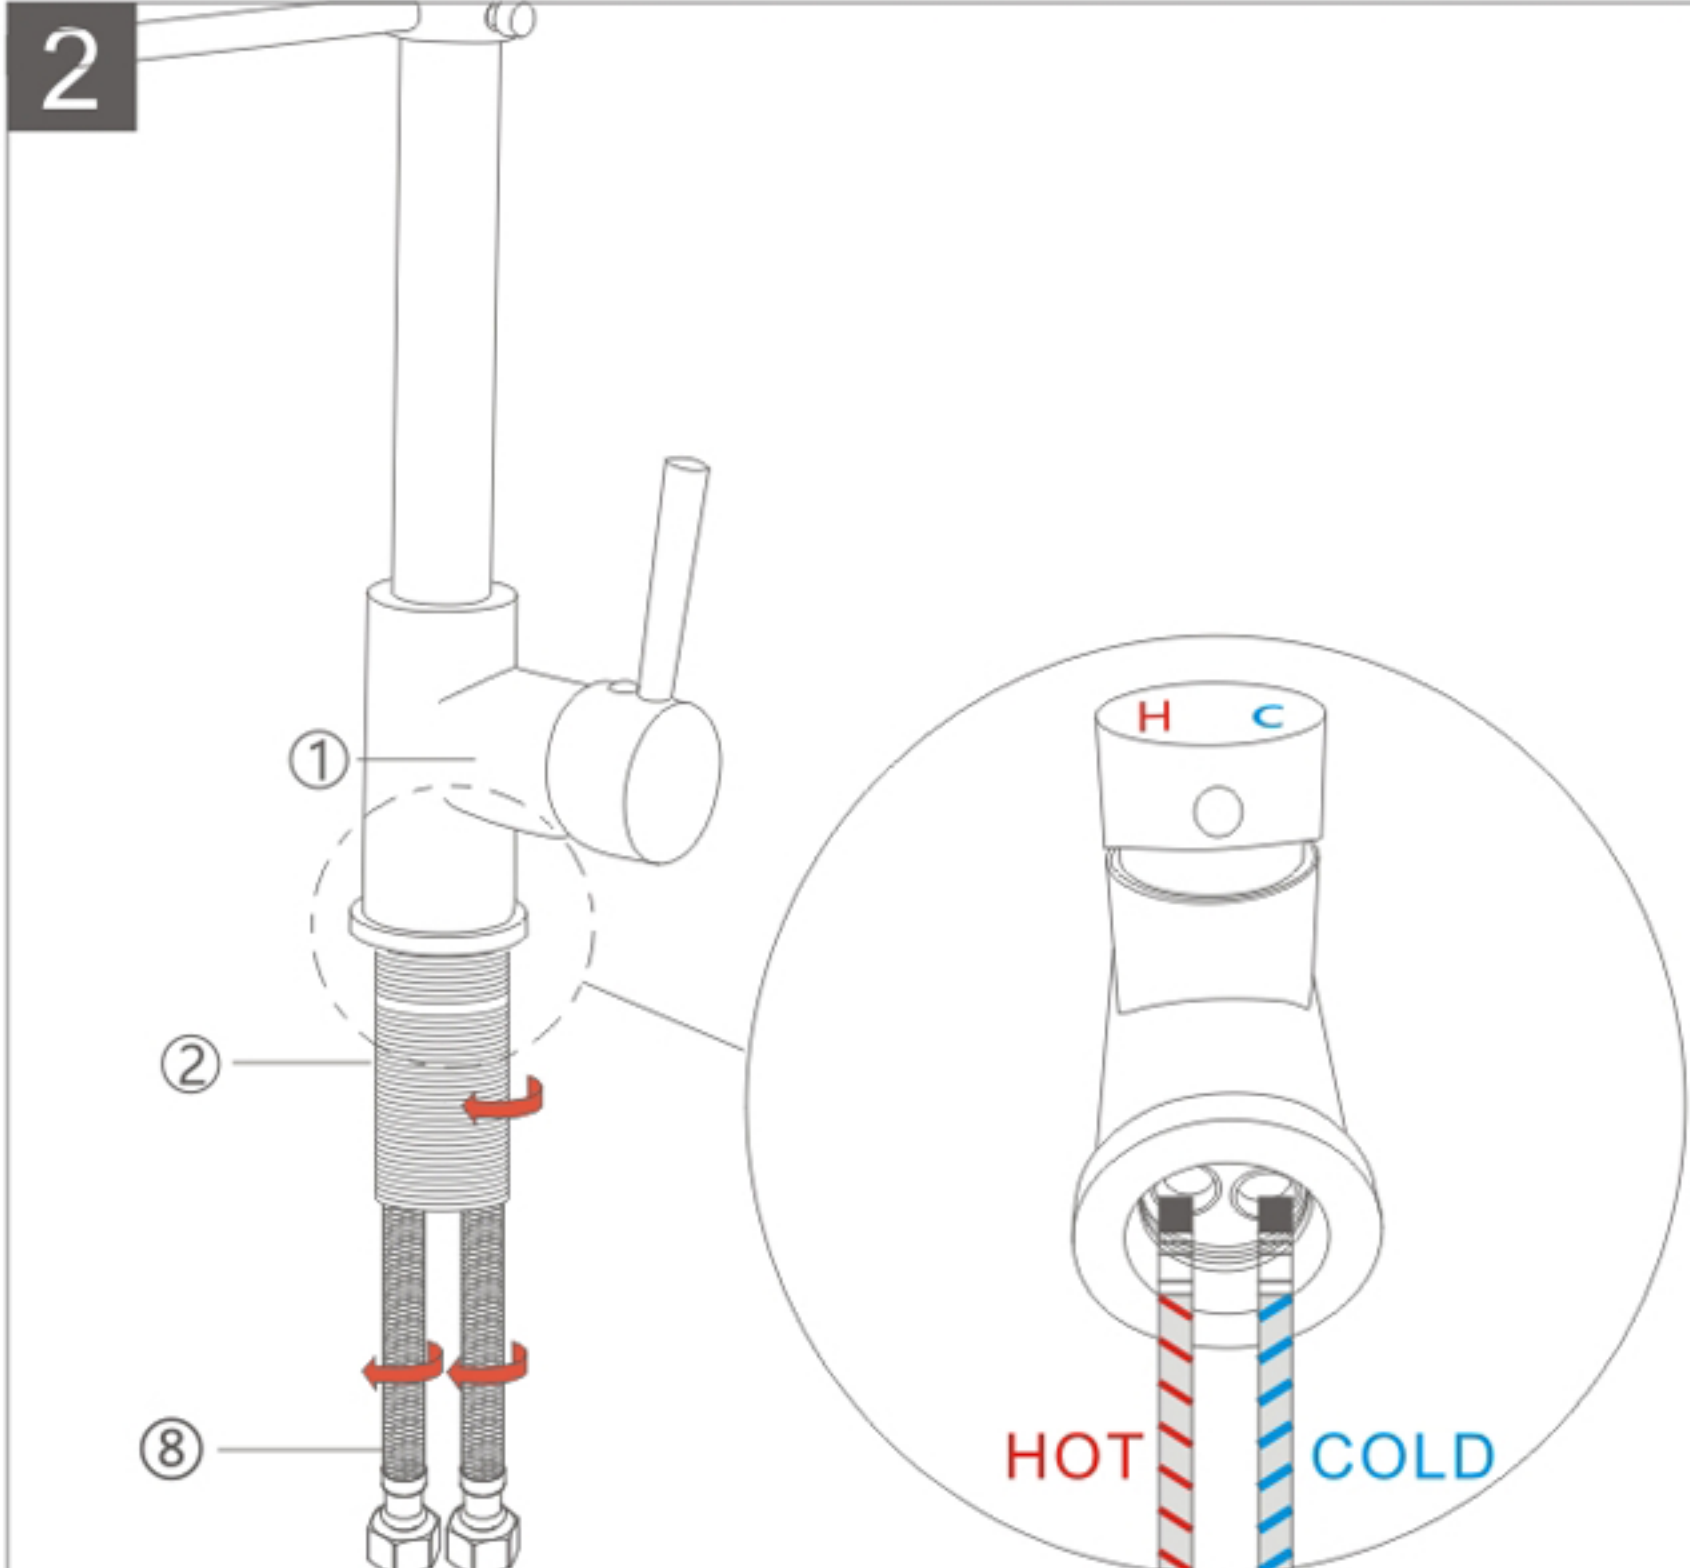

You may need:

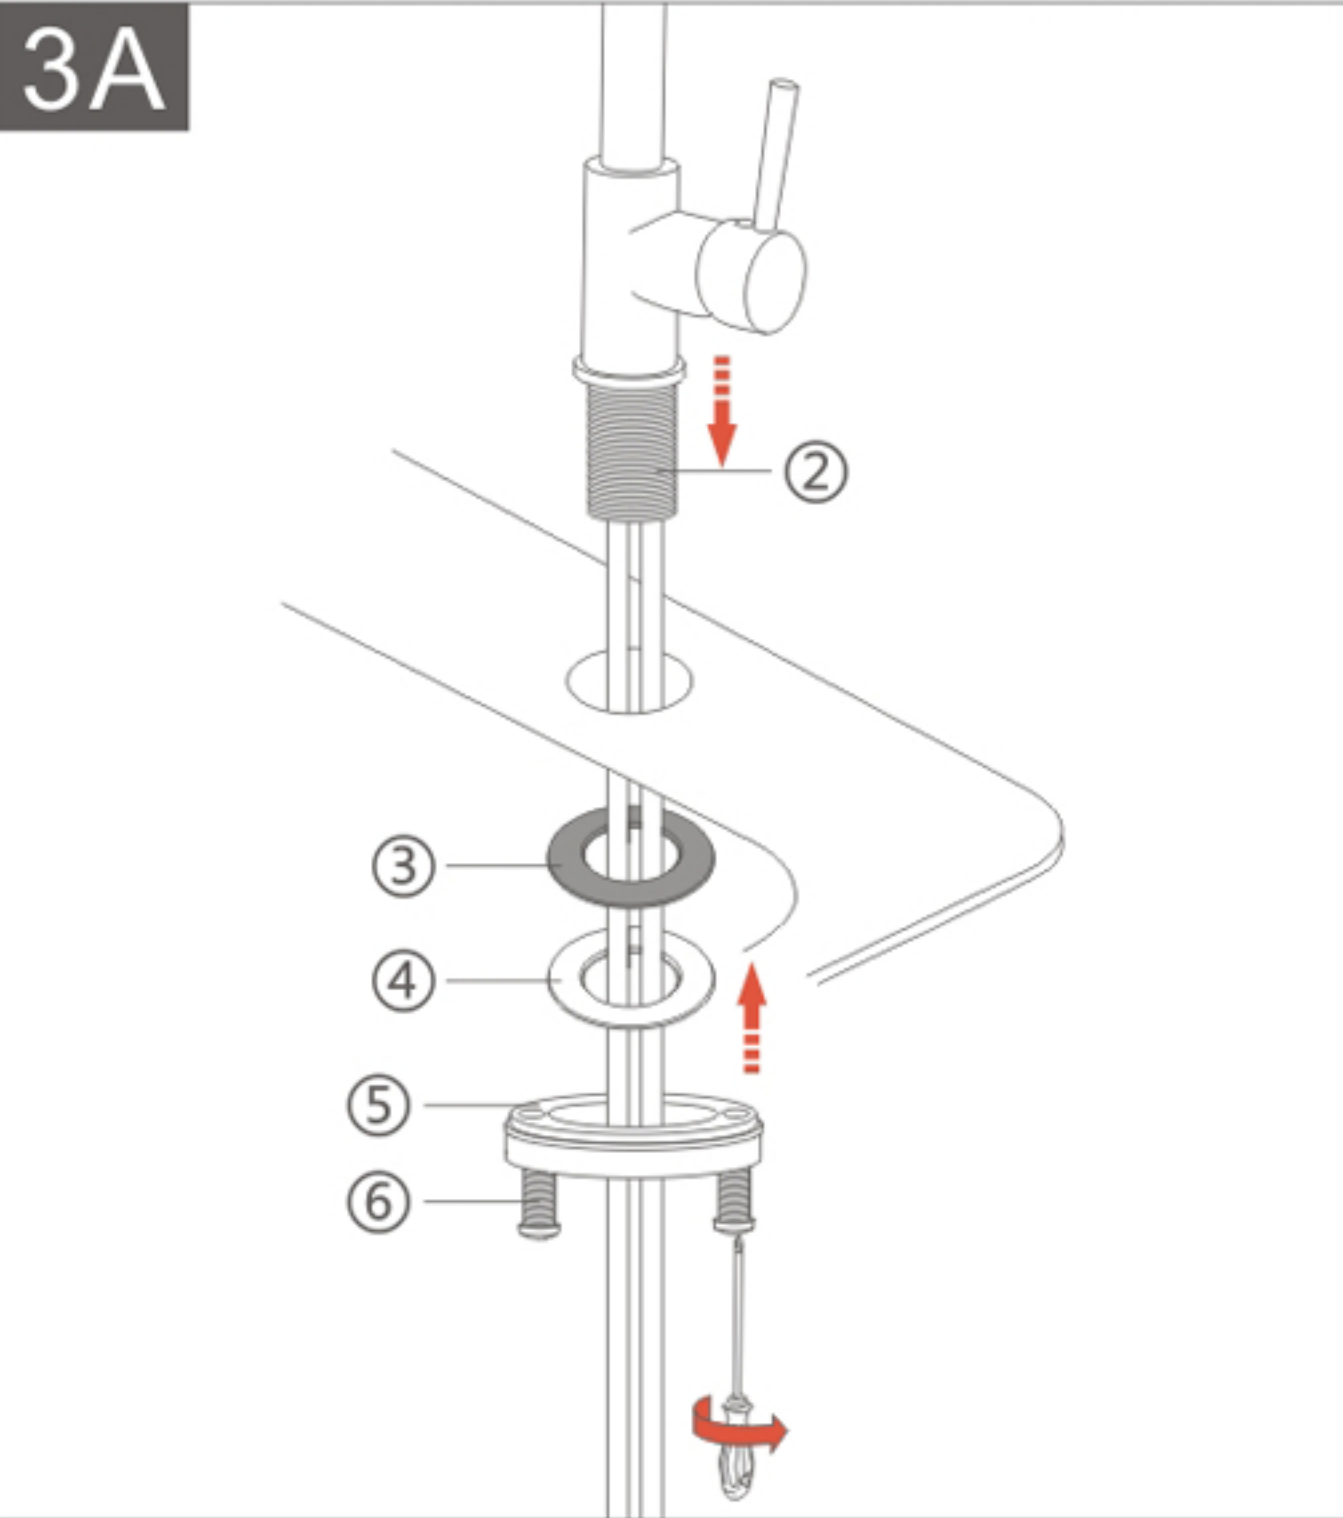

NO.	PART NAME
1	Faucet
2	Mounting shank
3	Rubber Washer
4	Metal Washer
5	Mounting Nut
6	Screw
7	Deck plate
8	Supply lines
9	Transform adapters

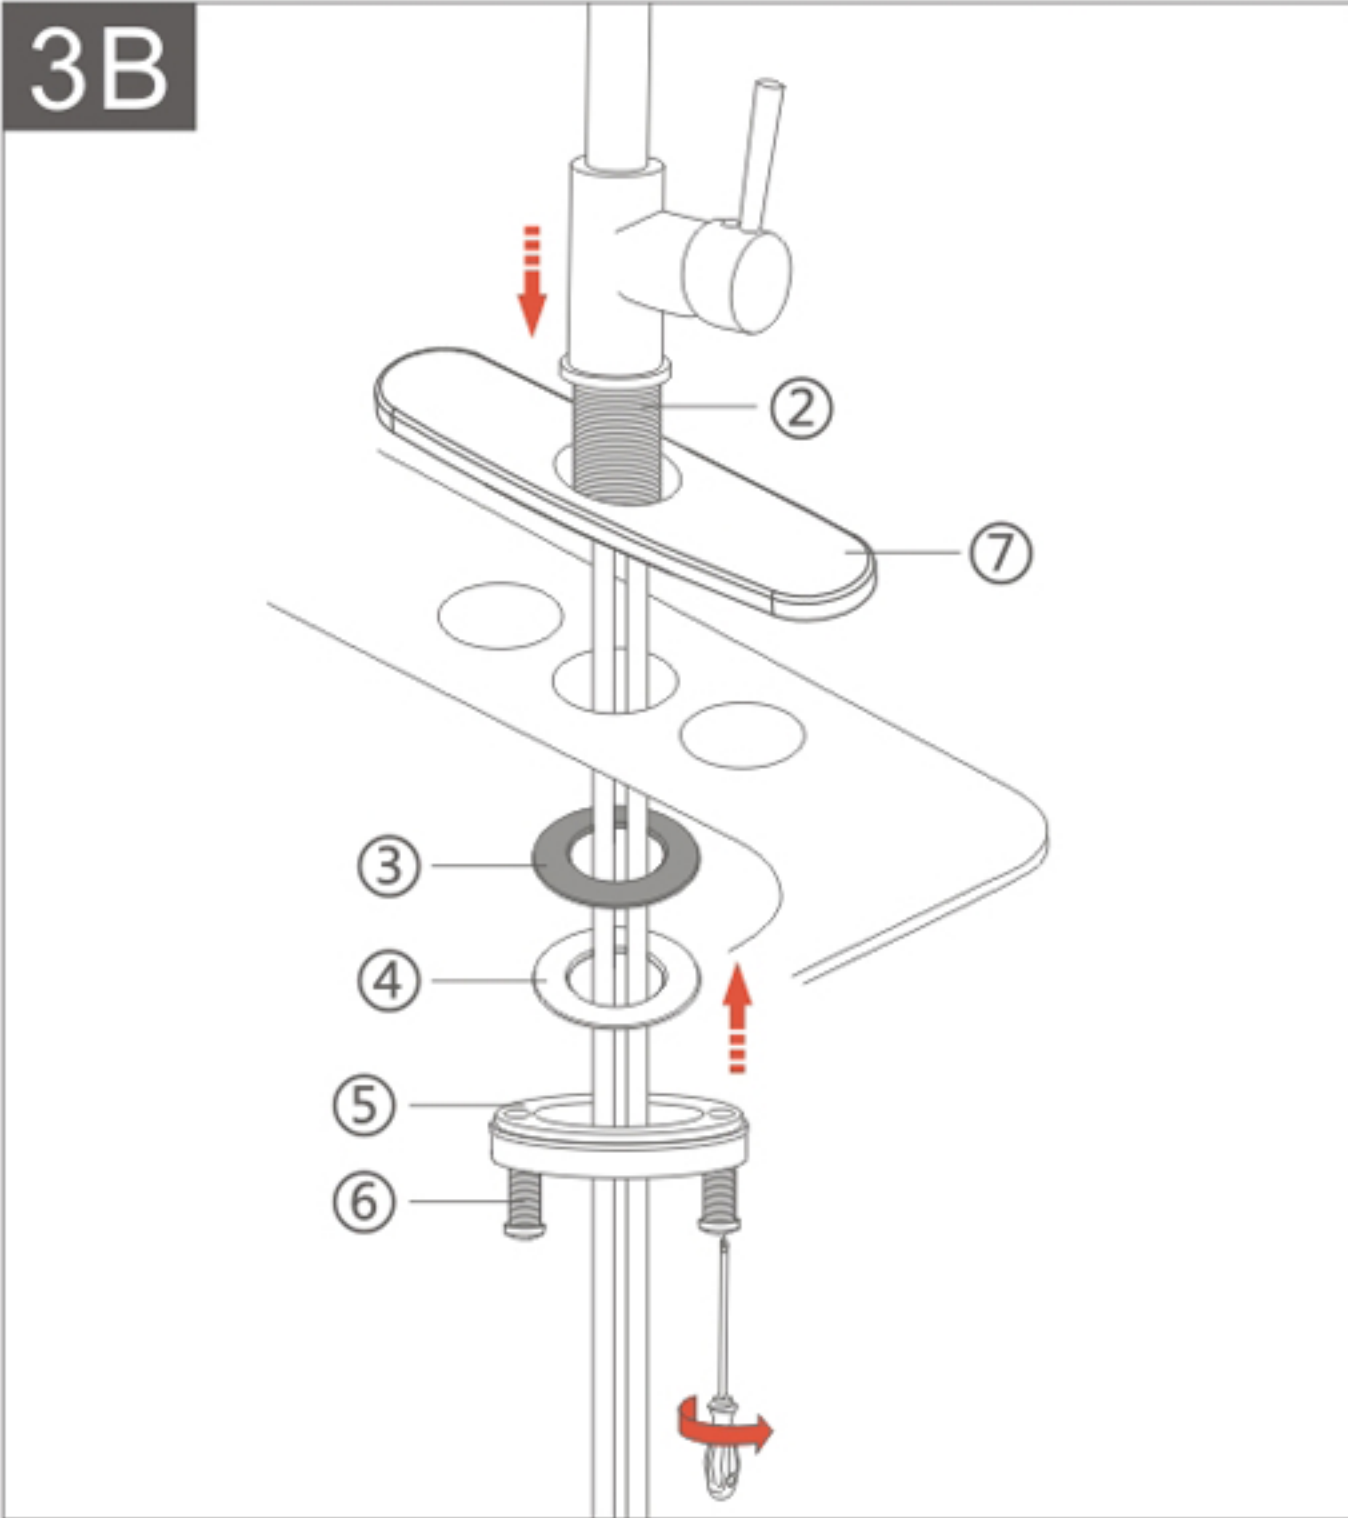

Insert supply lines (8) through the shank (2) from bottom of the shank.

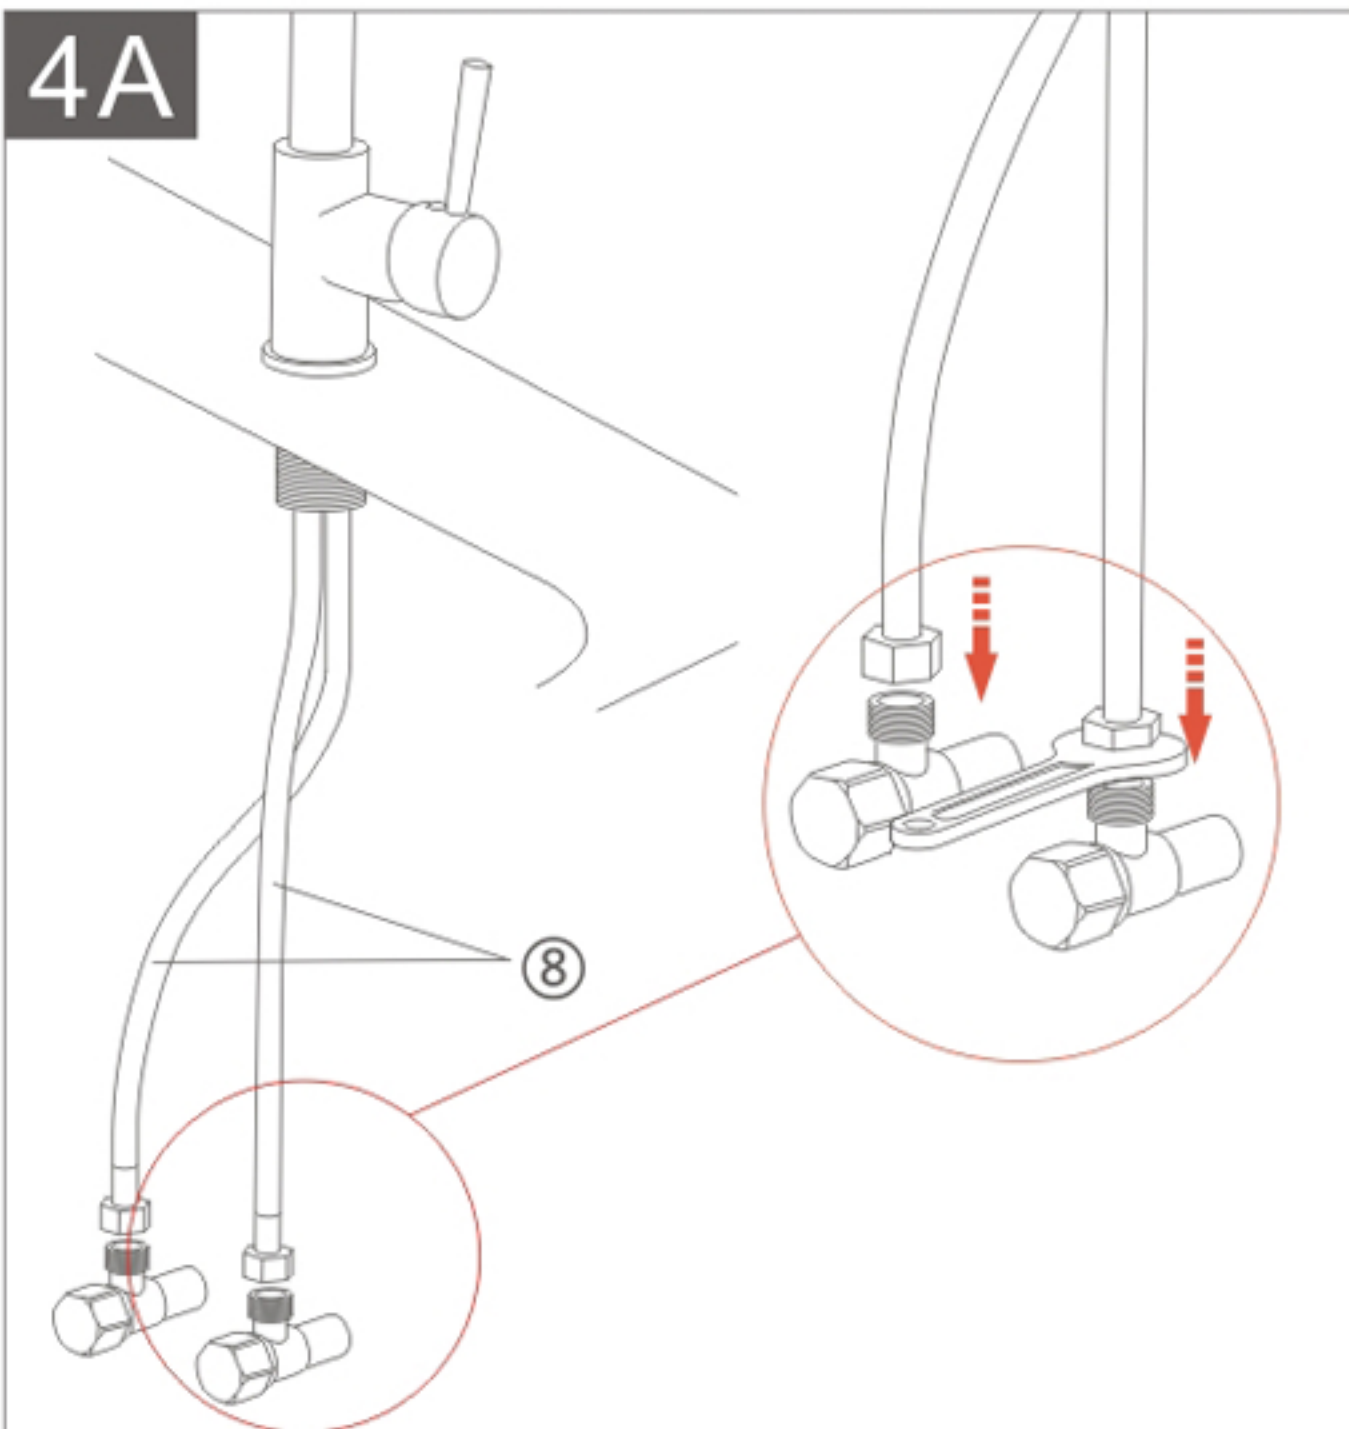

Thread hot and cold supply lines (8) to the faucet (Thread Hot supply line to H side, thread Cold supply line to C side),then thread the shank (2) onto the bottom of the faucet.

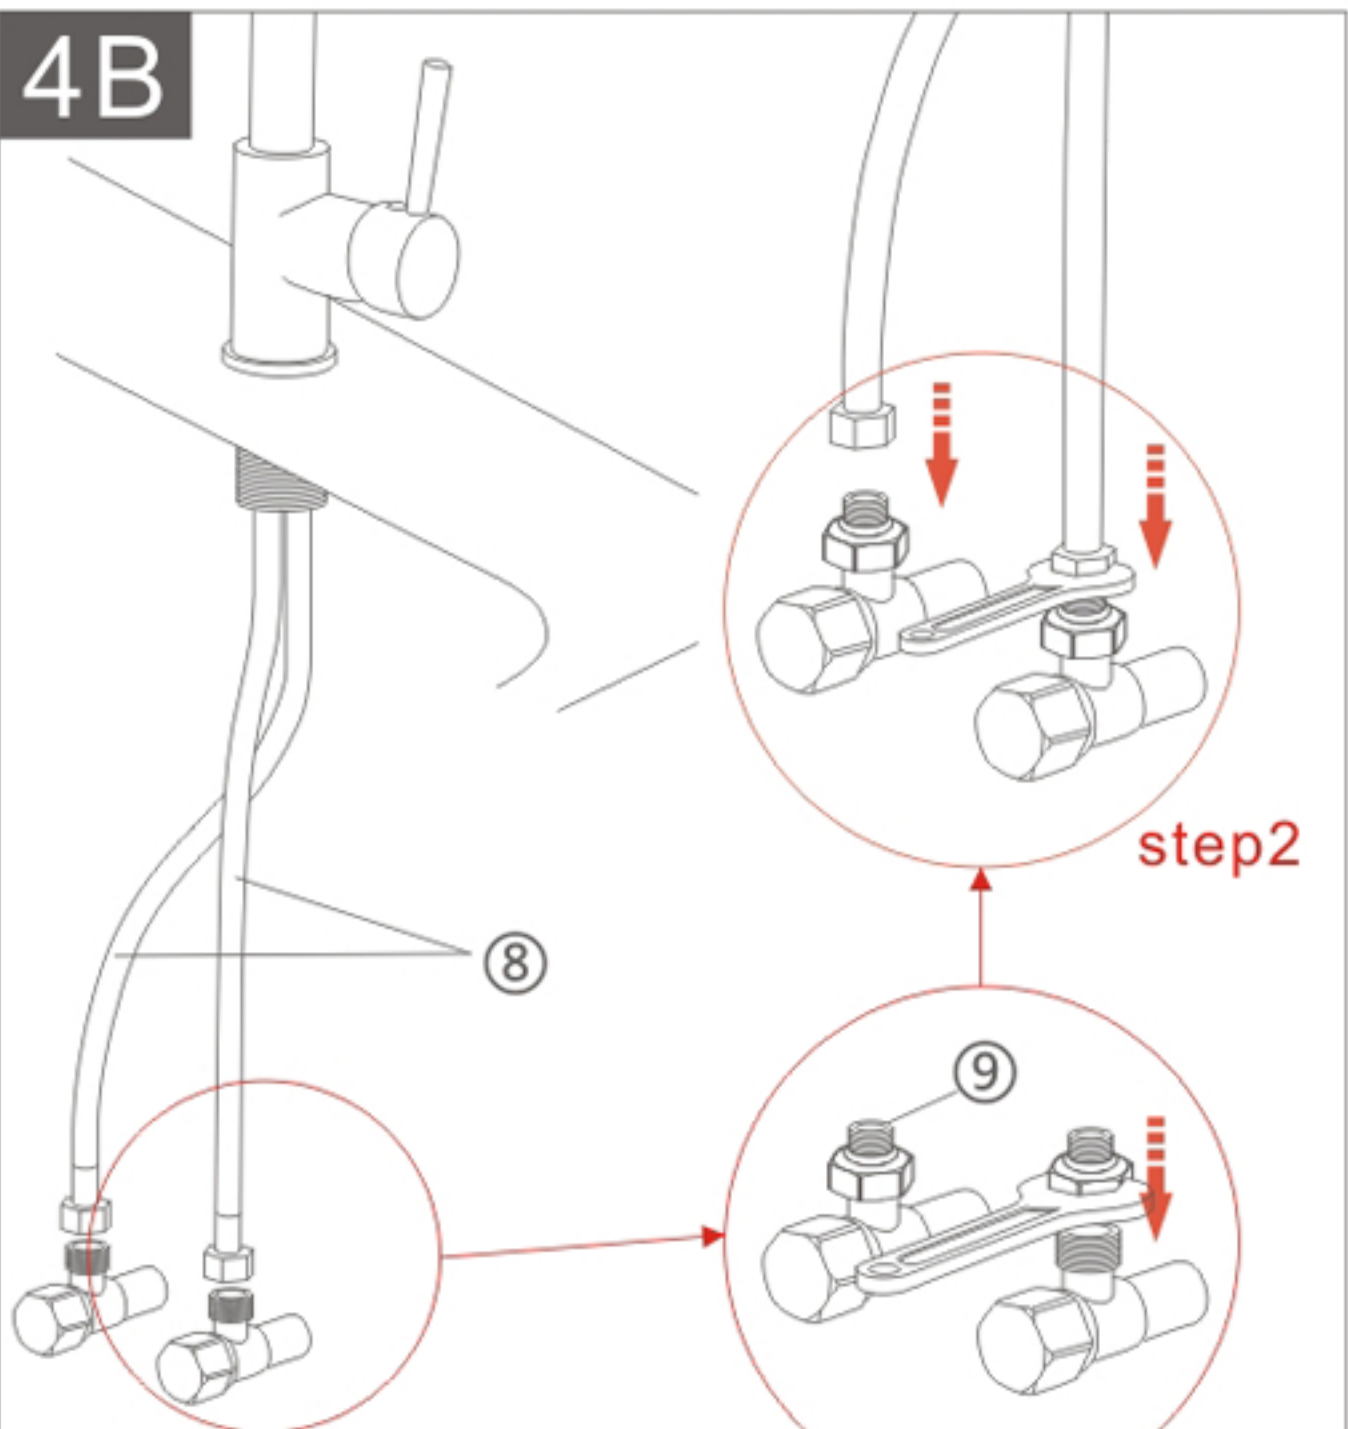

Slide mounting shank (2) through sink from above, then slide the shank (2) through the rubber washer (3), then through the steel support washer (4). Ensure base is aligned with sink ,fully tightening mounting nut (5), tightening the screw (6).

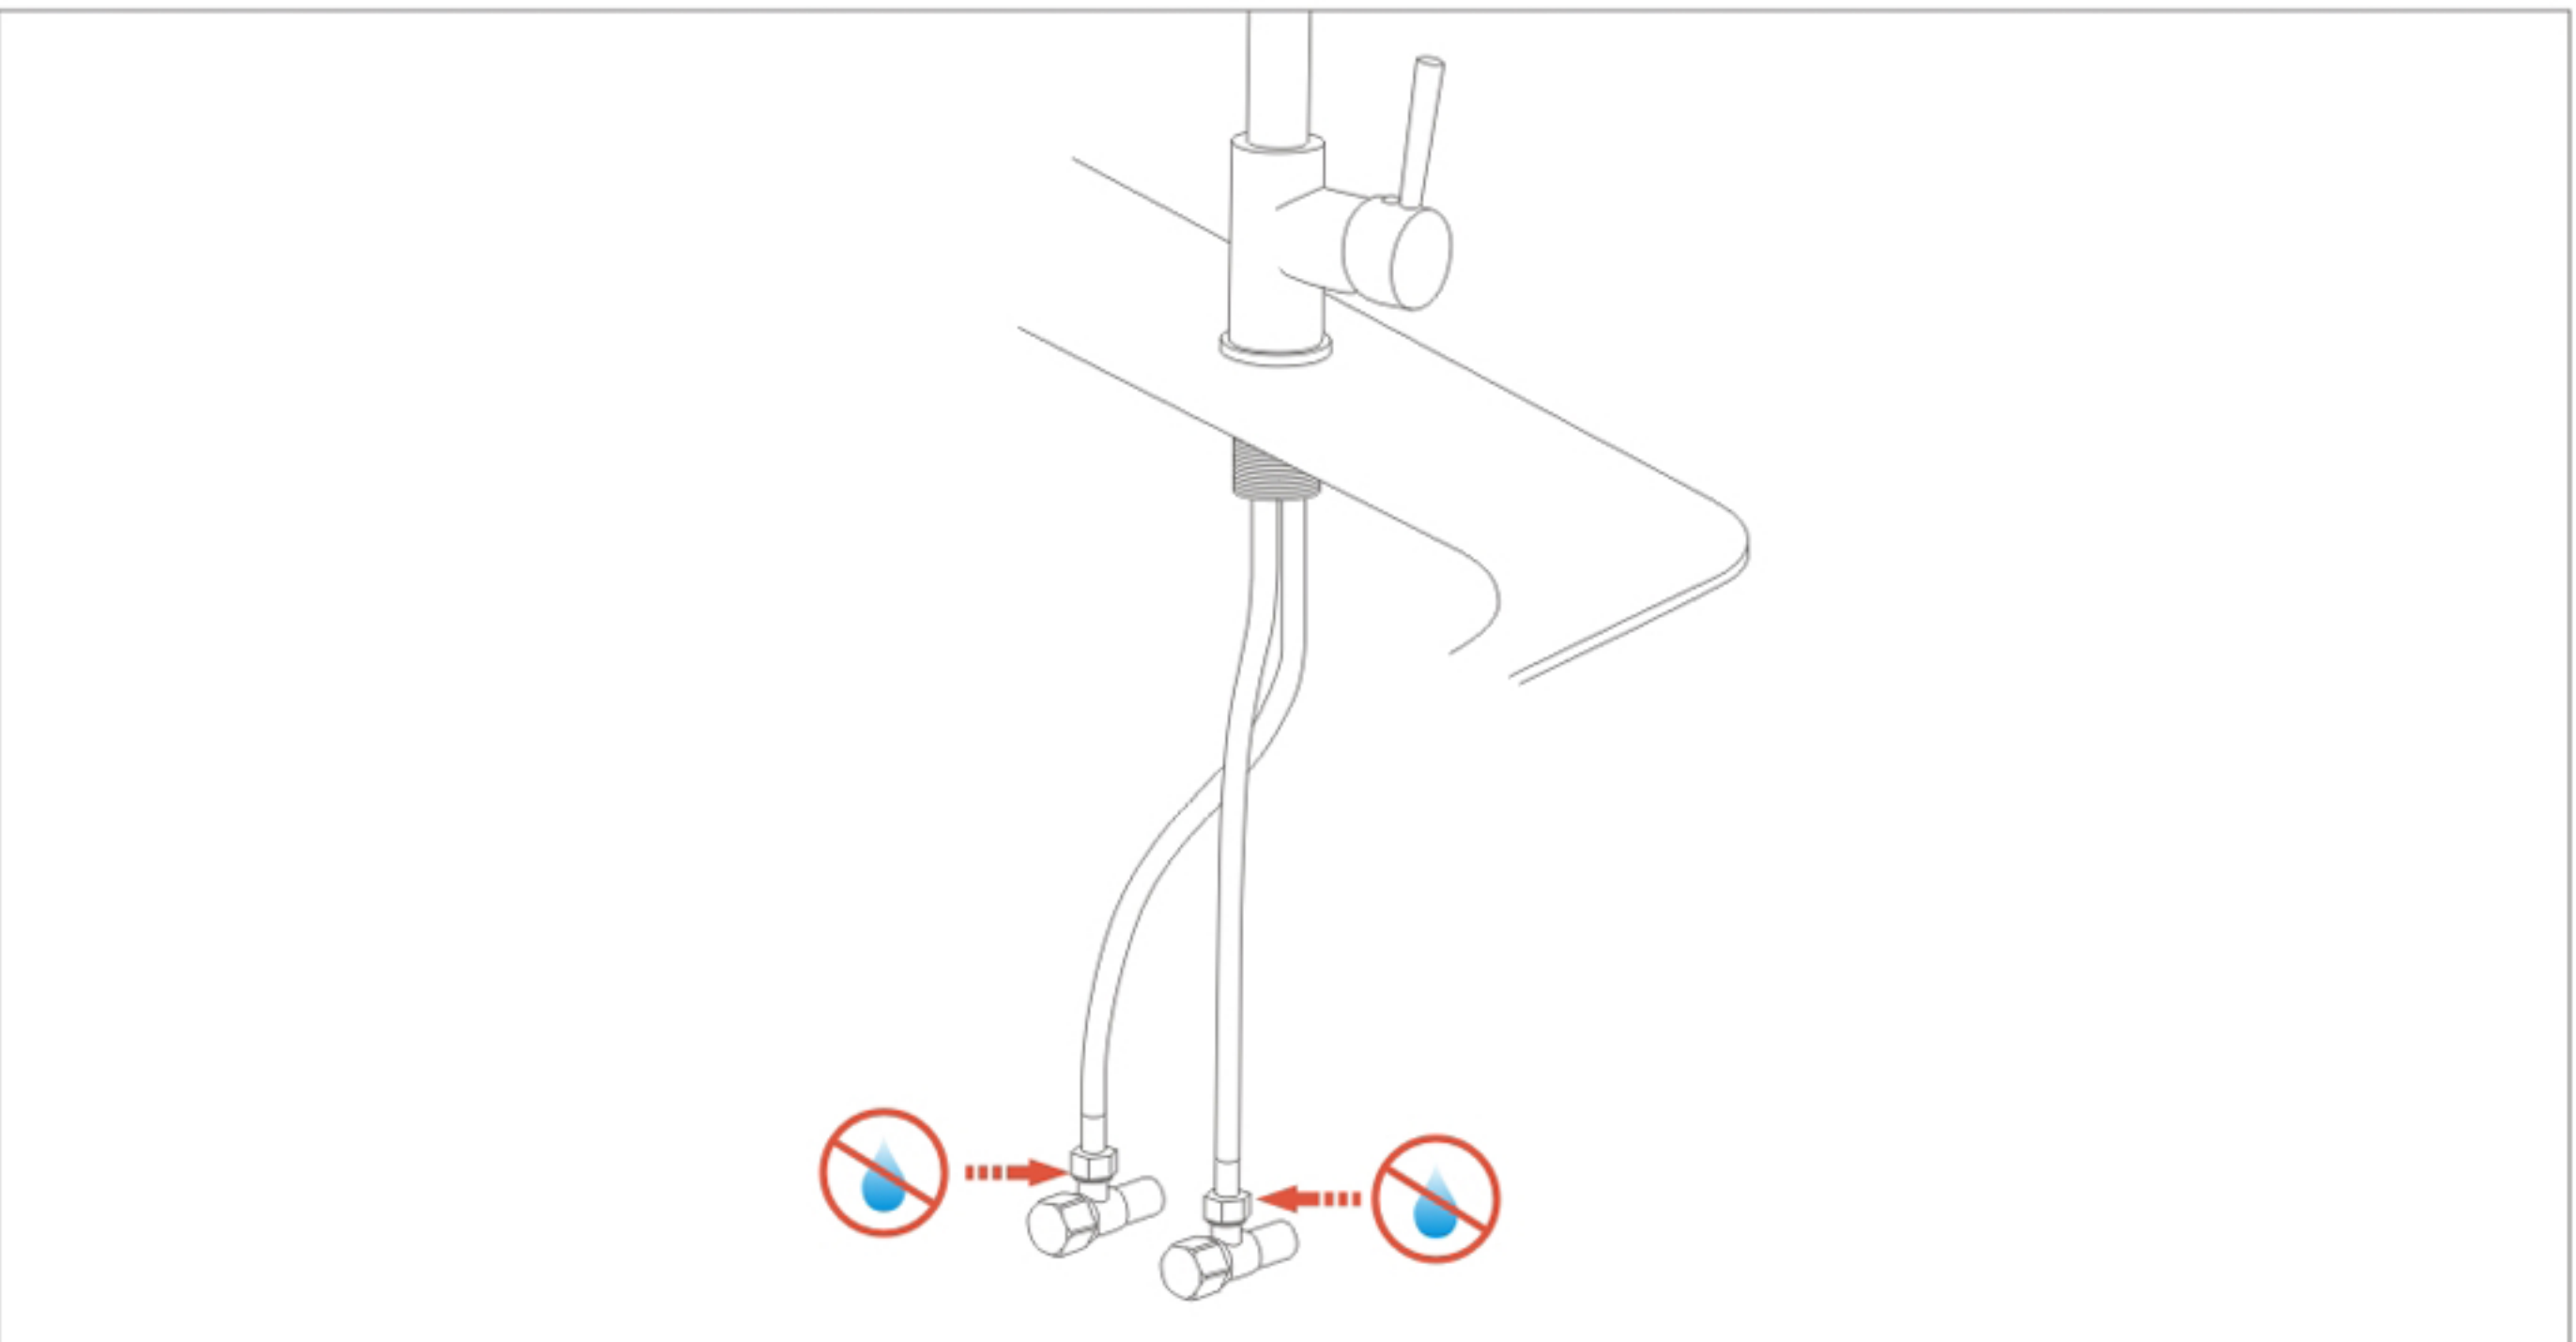

If the sink has three holes, Slide mounting shank (2) through deck plate (7) and sink from above, then slide the shank (2) through the rubber washer (3), then through the steel support washer (4). Ensure base is aligned with sink, fully tightening mounting nut (5), tightening the screw (6).

If the thread of the angle valve is 3/8", thread hot and cold supply lines (8) to angle valves using wrench.

If the thread of the angle valve is 1/2", first thread the transform adapters (9) (transform 1/2" male thread to 3/8" male thread) to angle valves using wrench, then thread hot and cold supply lines (8) to transform adapters (9).

Turn on both water supplies at angle stops and faucet handle, check for leaks at all connections made during this installation, Refer back to the appropriate installation instructions and retighten if necessary.
